

Unified Cloud Server Management

InfraGuard's platform simplifies patch management, user access, and server maintenance for cloud or on-premise servers.

SIMPLIFY YOUR SERVER OPERATIONS

Manage all of your servers from one tool, no matter what cloud they're on.

PATCH MANAGEMENT

Supercharge your patch management operations with powerful automation.

PRIVILEGED ACCESS MANAGEMENT

Take complete control of who has access to cloud servers with RBAC.

SERVER ADMINISTRATION

Easily manage your server fleets through a single pane console.

- Lower Operating Costs
- Faster Incident Resolution
- Scale to Greater Heights
- Improved Server Security
